

PLACEMENT OF MAILBOX

Because of varying road and curb conditions, the Postal Service recommends that you contact your local postmaster for approval of the location of your mailbox before you put it up.

Put a roadside mailbox where a carrier can safely reach inside without leaving the truck. That means positioning it about 41" to 45" off the ground and back about 6" to 8" from the curb. In the absence of a raised curb, add 6" to the mailbox height. If you live in the city and are attaching the box to your house, just make sure it can be accessed easily from your sidewalk, steps, or porch. Because city carriers often shoulder heavy bags, put your mailbox about 4' from the ground. That way, your carrier won't have to stretch or bend to reach it. And remember to keep the path to your mailbox clear in inclement weather.

City Code requires:

11-830 Display of Numbers

It shall be the duty of the owner, lessor or occupant of every house, industrial, commercial or other building, to have proper house or building numbers either by affixing such number assigned in metal, glass, plastic or other curable material. The number shall **be not less than 12 inches in height on all commercial/industrial buildings and a minimum of 4 inches in height on residential buildings**, and in a contrasting color to the building. Said numbers are to be placed on structures, not garage doors, and to be easily seen from the street fronting the building. Said numbers are also to be placed on both sides of mailboxes, except where mailboxes are in a group, the numbers shall be placed on the front and on the side of each end mailbox. All auxiliary buildings within a unit having an assigned number, such as a garage, barn and buildings of the like nature, are not affected by the code.

11-730 Residential Driveway Widths

- A. Maximum width of a driveway at the curb to the right-of-way line to be 30 feet.
- B. Driveways on cul-de-sacs to be a maximum width of 24 feet from the curb to the right-of-way line. All properties on cul-de-sacs will be allowed only one driveway from the street.
- C. For parcels not on a cul-de-sac, a secondary driveway may be constructed with a maximum width of 24 feet at the curb to the right-of-way line.
